DETAILED ACTION

Election/Restrictions

Upon further investigation of this application, examiner has discovered that the original election requirement dated 10/04/04 was incorrectly prepared. Examiner asserted that original claims 21-23 were directed toward Figures 2-3 and 5-7, while claims 1-13 were directed toward Figures 9-11. In applicant's response, figures 9-11 (claims 1-13) were elected. However, it has come to the examiner's attention that not all of claims 1-13 were in fact directed toward Figures 9-11, but rather some of the claims were directed toward figures 2-3 and 5-7. Although examiner has already examined claims directed toward both species, examiner respectfully requests that applicant re-elect a species and submit claims readable thereon. Examiner regrets any inconvenience this may cause.

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - a. Figures 2 and 5
 - b. Figures 6-7
 - c. Figures 9-11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 32 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to Neil Nydegger on 07/29/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Houston whose telephone number is 571-272-7134. The examiner can normally be reached on M-Th 8:30-6:00 Alternate Fridays 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
